PROFESSIONAL SUMMARY

Final-year Computer Science student and Full-Stack AI Developer with 2+ years of hands-on experience in Python/FastAPI, React, and PyTorch-based ML pipelines. Proven ability to design and ship production-grade AI systems — from a RAG-based startup-audit platform that won the AINS 4.0 hackathon to a neural skill-recommendation engine trained on 580K+ real job records — that solve real recruitment and career-intelligence problems. Expert in RAG-based AI integration and full-stack development, with a passion for building AI products that make hiring and career decisions smarter.

EXPERIENCE

Graduation Internship (PFE)

Feb 2026 – Jun 2026

Yet Consulting

- Designing and developing an intelligent recruitment platform based on CV analysis and generative AI

Summer Internship

Jun 2024 – Sep 2024

The WebSide

- Developed e-commerce websites

EDUCATION

Bachelor's Degree (Licence)

2023 – 2026

ISAMM Manouba

- Big Data and Data Analysis — Mention Très Bien (High Honors)

Baccalaureate

2019 – 2023

Lycée Mohamed Dachraoui, Menzah 9

- Mathematics track — Mention Bien (Honors)

CERTIFICATES

- Professional Scrum Master — Scrum.org, 2026
- Microsoft Azure AI Fundamentals: AI Overview — Microsoft, 2024

SKILLS

Technical: Python, JavaScript, TypeScript, C, Java, PHP, HTML, CSS, React, Next.js, Angular, Symfony, FastAPI, Node.js, PyTorch, Scikit-learn, Tailwind CSS

Tools: Docker, Git & GitHub, MongoDB, MySQL/MariaDB, PostgreSQL, Supabase, Vite, Jupyter Notebook, OpenCV, LangGraph, Ollama, Postman, Linux/Bash

Languages: Arabic (native), French (fluent), English (fluent)

Soft Skills: Teamwork, Team Management, Communication, Adaptability, Creativity

PROJECTS

Firasa — AI Entrepreneurial Audit Engine

🏆 **Winner — Hackathon AINS 4.0: AI for Entrepreneurship (5-person team)**

- RAG-grounded platform that audits startup maturity across 5 dimensions (Market, Commercial, Innovation, Scalability, Green) via a gated scoring engine and a knowledge base of 32 real Tunisian institutions
- Built Supabase authentication (Google OAuth, sign-up verification), core frontend flows (Interview, Landing, Processing, Results), and Arabic localization
- Stack: Python, FastAPI, PostgreSQL, Supabase, React/Vite, LangGraph, Cohere, multi-LLM orchestration (Ollama, Hugging Face, Groq, DeepSeek, Gemini)

HumatiQ AI — Intelligent Recruitment Platform

Graduation Project (PFE) — Yet Consulting

- Full-stack platform for candidate screening: CV parsing, automated video/audio interview analysis, and AI-driven skill matching
- Backend with FastAPI, MariaDB and MongoDB, JWT/2FA authentication and Google OAuth; React/Vite frontend
- Applied computer vision (OpenCV, MediaPipe) and speech-to-text (faster-whisper) for interview evaluation

Job Market AI — Neural Skill Recommendation Engine

- Built an attention-based skill encoder (PyTorch) with a Conditional VAE to predict job profiles, score skill importance, and recommend upskilling paths across 390 tech roles
- Trained on 579,901 job/CV records (ESCO-filtered, 38,819-skill vocab), reaching 50.8% macro-F1 across 390 classes
